

NANDINI KULSHRESTHA

B.Tech Student in Computer Science & Engineering (4th Year)

Phone: +91 9068619911

LinkedIn: linkedin.com/in/nandini-kulshrestha-3ab3542a6

Email: nandinikulshrestha2005@gmail.com

GitHub: github.com/nandinikulshrestha

EDUCATION

GLA University, Mathura

Bachelor of Technology (B.Tech) in Computer Science and Engineering

Pursuing (4th Year)

Graduation: 2027

TECHNICAL SKILLS

Languages:

Frameworks & Libs:

Databases & ORM:

Developer Tools:

C, JavaScript, HTML, CSS, Python

React.js, NextJS, Express.js, Node.js

PostgreSQL, MongoDB, SQL

Git, GitHub, Visual Studio Code

PROJECTS

Mental Wellness App (AI Assistant)

Recent

Tech: Flutter, Web Development, SQL

- Built a comprehensive **Flutter-based mobile application** featuring an **AI assistant** tailored to deliver real-time, personalized mental wellness support for youth.
- Engineered robust backend integration and optimized **SQL queries** to manage sensitive user demographics, mood logs, and app state tracking seamlessly.

NLP Autocorrect System

Recent

Tech: Python, NLP, Machine Learning

- Developed an **intelligent text correction system** utilizing state-of-the-art **Natural Language Processing (NLP)** tokenization methodologies and **edit-distance algorithms**.
- Enhanced overall textual precision and system reliability by introducing a **probabilistic word correction framework** trained on contextual dataset dictionaries.

VRINDAVASTRA (E-Commerce Brand Website)

June 2025

Tech: Frontend Architecture, JavaScript, CSS, HTML

- Designed and deployed a highly responsive, modern clothing brand website leveraging fundamental UI/UX design components to scale brand engagement.
- Integrated custom product showcases, lead-capturing contact forms, and automated social media link pipelines; optimized layouts for mobile responsiveness and core SEO metrics.

Interactive Web & CLI Utilities Suite

Jan 2025

Tech: JavaScript, HTML5, CSS3, Python, REST APIs

- Currency Converter:** Programmed a responsive currency calculator that fetches up-to-date exchange rates via external financial REST APIs, establishing clean async logic handlers.
- Stone Paper Scissor:** Engineered a browser-based interactive game featuring random opponent generation AI logic, real-time score analytics tracking, and DOM manipulation hooks.
- Tic Tac Toe:** Created a foundational command-line architecture tool to validate algorithmic decision trees and data storage arrays.

INTERNSHIP EXPERIENCE

AI/ML Project-Based Intern

July 2025

KVCH (JOVAC Program)

- Accelerated skills in core AI/ML pipelines, performing exhaustive data preprocessing, cleaning, and structured exploratory data analysis (EDA).
- Implemented, trained, and benchmarked distinct Machine Learning models, assessing vital mathematical parameters to tune operational metrics.

Python Developer Intern

July 2024

ShadowFox (Software Development - handle: @shadowfax)

- Authored modular Python scripts to automate repetitive system tasks, minimizing human intervention errors.
- Dealt with advanced data arrays and data structures to deliver reliable solutions under accelerated timeline bounds.

LEADERSHIP & ACHIEVEMENTS

- **Smart India Hackathon (SIH 2023-24):** Selected participant and contributor; engineered functional software solutions under rigorous timeline constraints while working with cross-functional technical teams.
- **Deputy PR Head — Cyberonites Club (IEEE Student Branch):** Headed public relations, strategic outreach, and communication pipelines for standard technical chapters, tech fests, and workshops; boosted overall student enrollment and community engagement.
- **Coding Profiles:** Solved **90+** algorithmic problems across competitive programming hubs including **LeetCode** and **GeeksforGeeks** (LeetCode handle tracked).
- **Industrial Exposure:** Participated in an industry immersion visit to **AppSquadz (Noida, Oct 2024)**; gained deep architectural awareness regarding the Software Development Life Cycle (SDLC), version control practices, agile team workflows, and corporate environments.

KEY STRENGTHS

- **Problem Solving & Agility:** Proven aptitude for building minimum viable products (MVPs) and debugging logic architectures under critical hackathon environments.
- **Adaptive Learning:** Efficiently leverage progressive AI development environments and developer toolsets to optimize codebase structures, accelerate production speed, and bolster software quality.
